AUTHOR	Kelly, Dexter; Prather, George
TITLE	Los Angeles Community Colleges Information Digest [1998-99].
INSTITUTION	Los Angeles Community Coll. District, CA. Office of Research and Planning.
PUB DATE	1999-04-00
NOTE	285p.
PUB TYPE	Numerical/Quantitative Data (110) -- Reports - Research (143)
EDRS PRICE	MF01/PC12 Plus Postage.
DESCRIPTORS	*Academic Persistence; College Transfer Students; *Community Colleges; Degrees (Academic); *Educational Attainment; Educational Trends; *Enrollment; *Student Characteristics; Student Educational Objectives; Tables (Data); *Two Year College Students; Two Year Colleges
IDENTIFIERS	*Los Angeles Community College District CA

ABSTRACT

This digest presents information about the Los Angeles Community Colleges and their students using tables, charts, and narrative text that emphasize trends and changes during the past twenty years. Statistical highlights include: (1) in 1998, Los Angeles Community College enrollment declined by 45 students overall (East and Valley had the highest enrollments); (2) the Los Angeles student body has aged since the 1970s (students under 20 have dropped from 30% of enrollment in 1972 to only 17% in 1997); (3) sixty percent of Los Angeles Community College transfers in 1997-98 were members of ethnic minorities; and (4) the number of degrees awarded has continued to increase since 1991, and reporting of occupational certificates by the colleges has improved. For student and enrollment characteristics, the digest uses the categories of ethnicity, student load, class level and education attainment, time of day, entering status, and educational goals. Chapters are presented on fiscal and personnel resources. The digest also tracks student retention and persistence, and transfers to four-year universities. Retention rates are analyzed comparing students enrolled in day classes with those enrolled in evening classes, and with overall enrollment. Charts and tables compare district enrollment figures from 1964 through 1998. Enrollment is charted by educational goal, program expenditures, general fund income by source, and other topics. (NB)

HIGHLIGHTS

- The **Purpose** of the Information Digest is to present relevant and useful onformation about the Los Angeles Community Colleges and their students by means of tables, charts, and narrative text. The emphasis is on trends and changes in various features of the colleges and the district as a whole over the past two decades.
- The *Fall 1998 and Spring 1999 Summary* lists student and enrollment characteristics for the most recent Fall and Spring semesters.
- The **Chapters**, in Word version 6 files, offer a brief summary description of each topic, Charts showing multi-year district-wide trends, and Tables showing trends by both college and with percentages and totals for each college.
- The **Tables**, in Excel version 5, are lengthier, more detailed versions of the Tables in the chapters. They include a full span of trends in both percentages and numbers for each topic by college and district.
- The **Overview** includes a general description of the Digest and its components. The **Glossary** contains definitions of terms used in the digest and other Research publications.
- The **Enrollment and ADA/FTES** chapter and tables cover LACCD Enrollment by college from 1964 to the present; State and National enrollment comparisons from 1972 through 1996; ADA from 1969/70 through 1990/91; and FTES from 1987/88 through the latest academic year. It includes data for ITV and Summer Sessions in separate tables and figures.
- The **Student Demographics** chapter and corresponding tables show trends in the Gender, Ethnicity, Home Language and Age of students by college and district.
- The **Enrollment Characteristics** chapter and tables cover such topics as: Unit and Hour Load, Level of Prior Education, Status of Incoming Students, Educational Goals, and Day and Evening Weekly Student Contact Hours (WSCH).
- The **Student Performance and Articulation** chapter and tables cover outcomes and performance measures that include grades, retention, persistence, degrees and certificates, and transfers.
- The **Fiscal Services** chapter and tables cover General Fund income and expenditures under various categories and locations.

INFORMATION DIGEST -- OVERVIEW

In recent years, the *Information Digest* has been published annually in hard copy form as the *Annual Information Digest*, and in previous years as the *College Annual Report*. Its purpose is to present college and district-level information about: enrollment; student characteristics; instructional programs; student performance; support services; fiscal resources; and faculty and staff. The data are presented in tabular and chart form for easy reference, and to reveal trends and changes from the earliest year in which data in each category was collected.

It is hoped that the Digest will meet many of the needs for statistical information about the colleges of the Los Angeles Community College District. In addition to providing background data for administrative decision-making at both college and district levels, The Digest is intended to support such campus-based functions as the preparation of grant proposals, institutional and program accreditation, budget preparation, program development and review, strategic planning, and other tasks that require accurate and accessible information on many aspects of the college and its community.

The new online location of the Digest will enable information to be available in a more timely manner than the hard copy edition, since data can be updated constantly, as it is available, rather than being printed up once a year. The format is more flexible, in that the data can be shown in as detailed a form as the user wishes, depending on her/his need.

The Tables and charts are presented in downloadable files in two software packages; chapters in Microsoft Word 6, and spreadsheets in Excel Version 5.

The Chapters contain the Word 6 files, which are updated versions of chapters from the printed version of the *Digest*. Their tables present data that are comparable among colleges, and routinely collected each semester. Fall semester data are selected for illustration in most areas, since they represent the largest enrollments of the academic year. To conserve space for printing, table figures are listed at five-year intervals up to the mid 90s, when year-by-year data ensues. Whenever appropriate, the tables are accompanied by line charts, which illustrate district-wide trends over the entire time span for which data is available. A brief explanation is placed before each table or group of closely related tables, to provide background information and/or clarification of terms sufficient for understanding the table.

The supplemental Excel 5 spreadsheets contain more detail, with an uninterrupted span of figures from every year since the earliest year of data collection, including both percentages and numbers, by both college and district. In the printed version, there was not enough room for such an extensive and inclusive spread of information. And in the online environment, both spreadsheets and chapters may be revised and updated as new information becomes available. New categories of information may also be added.

In the tracking of aggregate figures on student characteristics and other indicators of institutional performance, the Digest attempts to provide a consistent set of "best estimates", so that changes in over time are accurately represented. These figures may differ from those in other publications for several reasons. First, all figures for student characteristics are in terms of enrollment as it was recorded at first census each semester. Enrollment is a constantly changing number within a term, and a fixed point within each semester must be established to track change from one year to the next. Secondly, "Unknown" or "Not Recorded" categories for characteristics such as ethnicity and others have in most cases been suppressed, and the number of students in these categories have been redistributed across the "Known". The "Unknown" or Not Recorded" categories for any characteristics may fluctuate significantly from one year to the next. We have uniformly assumed that these fluctuations were due to data collection problems of various sorts which, if shown, would produce the appearance of change where the "true" distribution of a characteristic did not vary.

Finally, we have "corrected" the characteristics of individual students where internal inconsistencies have strongly suggested error. Two examples of this are notable. Since 1990 the college application forms have carried two different questions which elicit whether a student has previously completed an AA or BA degree. Examination has revealed that a student's answers to these two questions do not always agree. We have interpreted that a students responding that they already had a degree on either of these questions should be regarded as the "best estimate" of that characteristic and have modified the data accordingly. This works to increase the number of degree holders slightly. In another case, we have reduced the number of students reported as being "concurrent high school students" by excluding those no longer of high school age or who report in other fields of the application that they have graduated from high school. This has reduced substantially the number reported as high school students, but provides what we believe are more meaningful and reliable figures.

The Glossary includes all terms whose meaning may not be self-evident. They are grouped in the same order as the characteristics and topics to which they are related, and in the approximate order of their appearance, rather than alphabetically. It is hoped this order will make the definitions easier to find.

The Office of Research and Planning will continue to publish additional reports on special topics which provide more detailed research and data on an annual basis. As noted above, the Office stands ready to respond to specific requests for information, or to assist users in the retrieval, collection, interpretation and analysis of data.

GLOSSARY

Student and Enrollment Characteristics

ENROLLMENT

Unduplicated Enrollment. The "head count" number of individual students. Each person is counted once, no matter how many classes are taken.

First Census. A count of students actively enrolled in credit classes during the reporting period prescribed by state regulations, which is the Monday of the fourth week of each semester.

Credit. Defines courses for which units may be counted as a portion of an educational sequence leading to a degree or certificate, as well as some courses that provide foundation skills for college entry.

Non-credit. Describes tutoring, adult education, and continuing education courses in such areas as ESL, basic skills, citizenship, parenting, special training for the disabled, and other programs, which do not yield college credit, but are eligible for state funding.

Average Daily Attendance (ADA). A measure of annual full-time attendance based on student full-time equivalent class hours. Up to July 1991, this was the unit of attendance used to calculate state reimbursement funding for each college.

Full-Time Equivalent Student (FTES). The measure of full-time attendance used to calculate state reimbursement since June 1991. It is based on a figure of 525 class contact hours per full-time student over the academic year, in credit and/or non-credit courses.

ETHNICITY

Ethnic Status. The ethnicity reported by students on a voluntary basis on the application for admission. The choices offered are: Chinese, Japanese, Korean, Filipino, Laotian, Cambodian, Vietnamese, Indian Sub-continent, and Other Asian; Black/ African-American; Chicano or Mexican, Central American, South American, and Other Hispanic; Samoan, Hawaiian, Guamanian, and Other Pacific Islander; American Indian/ Alaska Native and Other Non-White; and Decline to State. In Table 6, Enrollment by Ethnicity, these categories have been consolidated into Asian (including Pacific Islander), Black, Hispanic, and White. The Other category, which includes American Indian/ Alaska Native and Other Non-White, is not listed in the table.

Home Language. Also reported voluntarily by students on the application, in response to the question; *What is your primary language?*. The languages listed represent all the choices on the application.

STUDENT LOAD

Unit Load. The number of course units in which a student is active at the time of first census.

Full-time Students. Those enrolled for 12 or more units and/or weekly hours at the time of first census.

Hour Load. The number of weekly class hours attended by a student at the time of first census.

CLASS LEVEL AND EDUCATIONAL ATTAINMENT

Freshmen. Students who at the time of the most recent semester registration have completed fewer than 30 units of college credit.

Sophomores. Students who at the time of registration have completed between 30 and 60 units of college credit, but have not obtained either an associate or bachelor's degree.

Other. Students who at the time of registration have completed over 60 units without an associate degree.

AA or Higher Degree. Students who at the time of registration have earned an associate, bachelors, or higher degree (see **BA Degree** below).

US High School Graduate. Indicates students whose highest certificated educational attainment has been graduation from a high school or its equivalent in the United States.

Foreign High School Graduate. Indicates students whose highest educational attainment is graduation from a secondary school or equivalent outside the United States.

Not a High School Graduate. Indicates students who, regardless of age or credits earned, have not obtained a diploma or other certification at the secondary level or higher.

AA Degree. Indicates students whose highest certificated educational attainment is an associate degree or its equivalent.

BA or Higher Degree. Indicates students who have earned at least a bachelor's degree. From Spring 1993 through Fall 1995, these students were charged a $50 per unit tuition fee to attend community college classes in California.

TIME OF DAY

Day Students. Those enrolled exclusively in classes convening prior to 4:30 p.m.

Day-Evening Students. Those who attend both day and evening classes in the same semester.

Evening Students. Those enrolled exclusively in classes convening at 4:30 p.m. or later.

ENTERING STATUS

First-time Students. Students enrolled for the first time at any college, and exclusive of summer session enrollment.

New Transfers. Students new to the college who have transferred credits from another college.

Returning Students. Formerly enrolled students returning to the college after an absence of one or more regular semesters. Includes students who have attended another college during their absence.

Continuing Students. Those who were enrolled at the same college during the immediately preceding regular semester.

EDUCATIONAL GOALS

Transfer. A goal to transfer to a baccalaureate program at a four-year college or university, with or without an associate degree.

General Education Associate Degree. A goal to obtain an associate degree with a non-vocational liberal arts major, but without intent to transfer.

Vocational Associate Degree. A goal to obtain an associate degree in a specific vocationally-related program, without specific intent to transfer.

Vocational Certificate. A goal to complete a vocational program's requirements for a certificate, without taking the general education courses required for the associate degree.

Job Skills. The goal to obtain specific job skills in a vocational field, without necessarily completing all courses required to earn either a certificate or an associate degree.

Instructional Programs

Weekly Student Contact Hours (WSCH). A measure derived by multiplying the number of students enrolled in a class by the number of hours per week the class meets. For example, a class with 30 students which meets for one hour three times a week would generate 90 WSCH.

Duplicated Enrollment. The number of students enrolled in classes, courses or disciplines, when these categories are aggregated and summed. An individual student would be counted as many times as the number of classes in which he or she was enrolled; for example, a student attending three classes would be counted or "duplicated" three times. This rarely-used measure is used in this document only for Community Services.

Student Performance and Articulation

Retention Rate. The percentage of students enrolled at First Census who are still enrolled at the end of the semester.

Entering Cohort. A population of students who have enrolled for the first time at a given college in the same semester.

Persistence Rate. The percentage of a student cohort that has continued to enroll in one or more future semesters.

Fiscal and Personnel Resources

General Fund. Includes all funding that supports the basic operations of the District, both restrictive and nonrestrictive. Includes most categorical funding, but excludes accounts for cafeteria, bookstore, child development, special reserve, and the grant funds for Financial Aid.

Basic Program. Includes unrestricted funding, which can be allocated at the discretion of college and District administration. Identified as Program 100 in the budget and expenditure reports.

Special Funding. Also called categorical or restrictive funding. Supports programs that are designed and overseen by state and federal agencies outside the District, including such special student services as Disabled Students Programs and Services, EOPS, Financial Aid and Veterans Programs. Special funds may be spent only within their programs, and according to guidelines laid down by the funding agencies, which periodically audit program expenditures.

PERSONNEL

Executive/Administrative/Managerial. Defines all persons responsible for management of an institution or a major department or subdivision thereof. Includes all certificated administrators and some classified managers.

Faculty. Defines all full- or part-time certificated personnel in teaching, counseling, and librarian positions.

Professional Non-Faculty. Defines classified positions requiring college or graduate-level training and, minimally, a baccalaureate degree. Includes various analysts, bookstore managers, staff aides and assistants, accountants, etc.

Secretarial/Clerical. Defines positions in clerical or secretarial activities.

Technical/Paraprofessional. Defines positions requiring specialized technical and/or paraprofessional skills; includes computer operators, programmers, lab technicians, instructional aides, etc.

Skilled Crafts. Defines positions requiring special technical and manual skills; includes carpenters, painters, electricians, etc.

Service/Maintenance. Positions requiring technical and manual skills sufficient to perform custodial, groundskeeping, or food service tasks.

HIGHLIGHTS:

- Since 1980, headcount enrollment in the Los Angeles Community Colleges has fluctuated more widely than state or national community colleges, and the LACCD has been slower than the state as a whole to recover from decline.

- In 1998, LACCD enrollment declined by 45 overall; only Mission College experienced an increase (1.4%). East and Valley had the highest enrollments.

- Apportionment measures in Los Angeles Community Colleges followed enrollment to a low point in 1985-86. FTES rose to a peak in 1991-92 before declining in the subsequent two years; by 1997-98 it had risen to over 70,000.

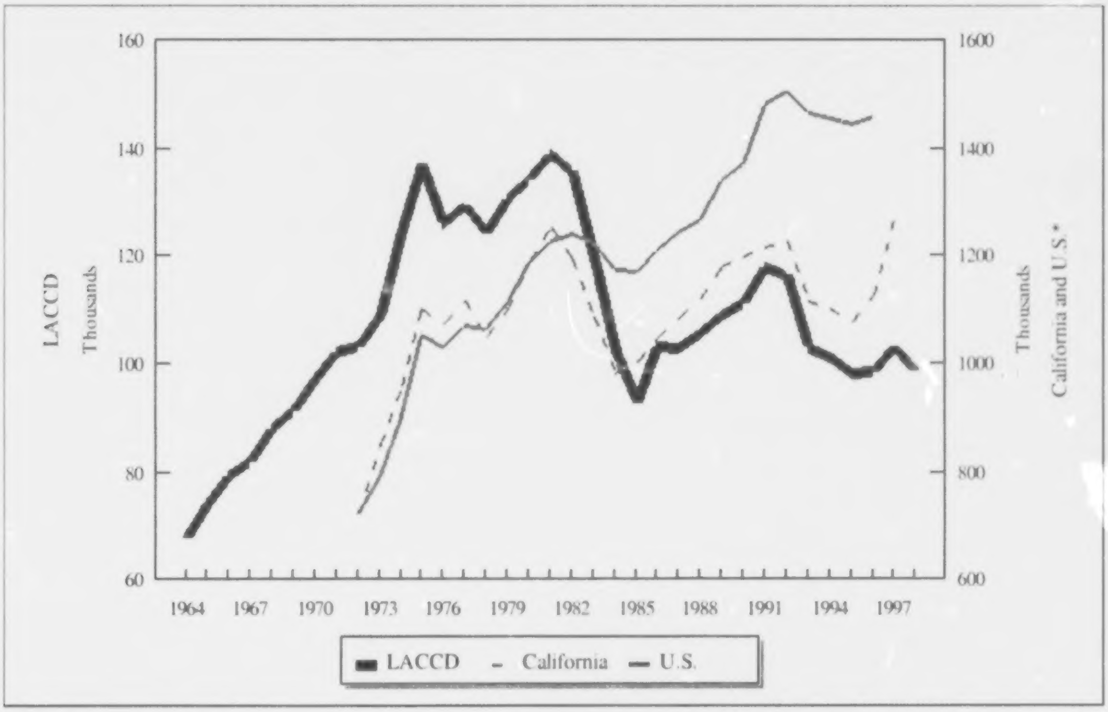
ENROLLMENT BY COLLEGE, DISTRICT AND STATE

District enrollment peaked in 1975 and then again in 1981. Between 1981 and 1985 District enrollment delcined by over 33%. Fall 1997 enrollment was still only 74% of the 1981 figure. Changes in District enrollment have largely reflected trends in community college attendance in the state and the nation over this period, but the fluctuation in numbers for the District have generally been greater as is shown in Figure 1.

FIGURE 1: DISTRICT, STATE AND NATIONAL COMMUNITY COLLEGE ENROLLMENT, FALL 1964 - FALL 1998



Tables 1.1 through 1.3 show the full span of District enrollment from the early sixties, and for the State since 1972. National credit enrollment figures were obtained from the federal Department of Education's National Center for Educational Statistics; the latest semester for which this data are available is Fall 1994. Blank spaces for Mission, Southwest and West indicate the years before these colleges were established.

Non-credit course enrollment is tallied from 1986, when it grew to significant levels at several colleges; it is not available at the national level. These numbers represent reimbursement-generating enrollment, and do not include recreational/avocational classes offered through community services. The first census non-credit numbers listed here do **not** include students also taking credit classes. They may be somewhat lower than total semester non-credit enrollment, since classes are often modular and not even begun by first census.

MEASURES FOR APPORTIONMENT

These tables and figure cover the two measures that have been used to determine apportionment of funding by the State for student hours of enrollment. Up to 1990-91, the measure used was Average Daily Attendance (ADA), which has been replaced by FTES (Full -Time Equivalent Student) with the introduction of program-based funding. Both are computed by a formula that divides the total hours of class attendance over an academic year by 525, a number representing 15 hours per week of class attendance by one student over two standard semesters.

The currently used FTES measure is obtained by three slight variations of the same calculation. For full semester classes, enrollment at census date is multiplied by 17.5, which is the number of weeks of instruction over a full semester; the product is divided by 525. For short term classes with regularly scheduled meeting times, which are labeled Daily Student Contact Hour (DSCH) classes, the length of the class in weeks is substituted for the 17.5 factor. Classes designated as Positive Attendance have one or more of the following characteristics: not meeting at regular hours; operating on an open entry-exit basis; apprenticeship; or non-credit. For these classes, the total hours of attendance for the term are tallied and divided by 525.

The previously used ADA measure was calculated in the same way, except that the average of first and second census was used for full semester enrollment, and was then multiplied by .911, an "attrition factor", which is an estimate of the percentage actual attendance is of active enrollment. After these calculations the product was divided by 525. Of course, the resulting ADA figures were lower than the corresponding FTES, as shown in the overlapping years in Figure 2.

*ITV ADA and FTES figures are included in the District totals but not shown separately in the table. Beginning in 1989-90, ITV figures are included in the figures for City College

SUMMER SESSION ATTENDANCE

In the years before 1996, all colleges offering classes in summer conducted a session of six weeks. Because of its short duration, most of its classes required three times more weekly hours than were needed during the fall and spring semesters. Summer session WSCH was consequently greater, but its literal display can be misleading in comparing summer productivity to other semesters. The figures for the years before 1996 listed in Table 15 and its graphs have been adjusted to display the equivalent of regular semester WSCH. The raw numbers was divided by three, since the six-week summer session was a third the length of an eighteen-week semester, and most classes meet nine hours a week instead of three.

A radical change in Summer session scheduling occurred in 1996, when each college became free to offer one or more sessions in any configuration, in order to provide a flexible response to student needs for classes. The earliest sessions usually began before the end of June, overlapping with the previous academic year. Attendance may be counted as Daily Student Contact Hours (DSCH or Positive Attendance, but never as WSCH. The variable patterns of scheduling make it difficult and unnecessary to obtain an unduplicated headcount of summer students. For these reasons, the productivity of Summer Sessions from 1996 on will be measured only in FTES, which is also provided for Summer 1995.

All figures are for credit classes only.

Note: Converted to semester equivalent to allow for the six-week length of the summer session, and consequent greater WSCH. No summer session was offered in 1978.

DISTRICT ITV ENROLLMENT AND WSCH

Instructional Television (ITV) offerings are broadcast usually in the early morning hours. Patterns of enrollment and WSCH often do not match those of campus-based programs; spring semesters have often had larger enrollments than fall. In 1994-95, the summer enrollment was the largest of the three semesters. As at the colleges, the ITV Summer Session is only a third as long as the Fall and Spring sessions, and the weekly hour load correspondingly greater. Therefore, Summer WSCH figures here have been divided by 3 to obtain an approximate equivalent to the other two semesters. Figures for Summer 1996 are not available.

and George Prather, Ph.D.
Senior Research Analyst
December 1998

HIGHLIGHTS:

- Women have been a majority of students at all colleges except Trade-Tech since the late 70s, and their percentage has increased steadily since 1990.

- Hispanic students continue to increase in numbers and as a share of the student body, while whites have diminished steadily since 1975.

- More than a third of LACCD students speak a language other than English at home. At City, only 38% of students are native English speakers.

- The LACCD student body has aged since the 1970s; students under 20 have dropped from 30% of enrollment in 1972 to only 17% in 1997. "Traditionally" college-age students (under 25) are now only 46% of District enrollment.

- The oldest age group (over 35) is also the fastest growing in headcount enrollment; they are now a quarter of LACCD students. However, younger students take more classes and produce most of the College's reimbursable FTES. Older students tend to take fewer classes, and attend more in the evening.

ENROLLMENT BY GENDER

Figure 5 shows that, the gender proportion in the District as a whole was reversed after 1976, as females became the majority. Gender percentages evolved from 56% male and 44% female in Fall 1972 to precisely the reverse by Fall 1991; this trend has continued very gradually. Females have increased their percentages at all colleges, and are the majority at all colleges except Trade-Tech, where the female share of the student body has risen by more than a fifth of the whole since 1972. The greatest increase in female participation occurred before 1980; since that time it has fluctuated within a range of two or three percentage points at most colleges.

ENROLLMENT BY ETHNICITY

Data on student ethnicity have been obtained from responses to a multiple-choice question on the student application. Until 1990-91 the choices were the four listed on this table: Asian, Black, Hispanic and White, along with Other. Beginning in Fall 1990, a new application listed 18 ethnic categories. The data obtained from the new or returning students filling out this application have been consolidated into the four "old" categories listed on this table. Thus the Asian group includes students identifying themselves as Chinese, Japanese, Korean, Filipino, Laotian, Cambodian, Indian Subcontinent, Pacific Islander, and Other Asian. Blacks would check only "Black, African-American", while Hispanic would include Mexican/Chicano, Central or South American, and Other Hispanic. White students would pick "Caucasian, White", while students choosing American Indian, Alaska Native, Other Non-white, or Decline to State, would be placed in the "Other" category. Space does not permit the inclusion in the table of this category, which accounted for only 2% of the total District student population in Fall 1998.

ENROLLMENT BY AGE

The age of a student is the characteristic most relevant to college attendance. Persons between 18 and 24 are the most likely to be college undergraduates. The most conspicuous trend in age groups during the 1980s was the decline in numbers and percentages of students under 20, who have represented the "traditional" age cohort for two-year colleges. In 1972, the teenage group was tied with those in their early 20s; since then, they have become fewer as the Baby Boomers have grown into older age groups, and have not been replaced by numbers as great as theirs. Although the number of teenagers in the LACCD increased significantly in 1997, the younger students are not expected to approach their baby boom enrollment levels in the near future. But, as Figures 5.2 and 5.3 show, they still attend in the greatest numbers of any age group, and carry the heaviest hour loads; more than half are full-time students.(See also *Clearer Thinking about Student Characteristics as a Guide to Policy Planning*, Office of Research and Planning, May 1993).

HIGHLIGHTS

- In hour-load terms, full-time students are a plurality of more than a third of all LACCD enrollment, followed closely by those in the middle range. Hour load may be a closer approximation of unit load across an entire semester than unit load itself.

- The number of U.S. High School graduates enrolled in Los Angeles Community Colleges has decreased since 1990, while numbers of both Foreign secondary school graduates and Concurrently Enrolled High School Students have increased. Enrollment of Bachelor's Degree-Holders has bounced back from decline since their per-unit fee has been reduced to the same amount that other students pay.

- The number of the LACCD's incoming students fell off sharply in the early 90s, and has not recovered. Among status categories, only returning students have shown any increase in recent years.

- The percentage of LACCD students stating vocational goals has surpasses that of direct Transfer seekers. A fifth of students either decline to state a goal on their application for admission, or ignore the goal question altogether.

- LACCD WSCH has declined considerably from its high point in 1981, and has only partially recovered in this decade. Most of the WSCH loss has occurred in daytime classes.

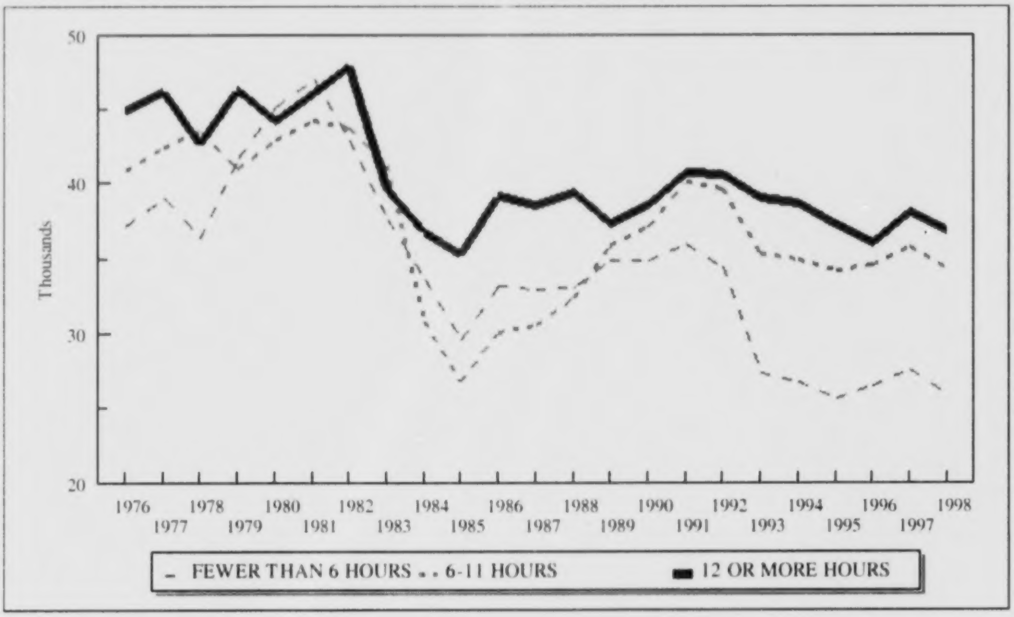
ENROLLMENT BY FULL-TIME/PART-TIME STATUS

Presentation of information on change in the number and proportion of students who are part-time versus full-time remains a problem. The source of student characteristic data presented in this volume is a demographic file capturing all students enrolled at the 1st census point in each Fall semester. Unfortunately, this file records only those units of enrollment for each student in classes which are active at first census. Students who are enrolled in short term classes which begin after 1st census are reported as enrolled in fewer units than will actually be the case over the whole semester. Thus the weekly hour load of each student may be a better representation of the true full-time/part-time status than units, although it will overstate the load of students enrolled in laboratory classes, which require more weekly class hours than their unit values. However, unit load continues to be the standard measure of student load at the college, district, state and national levels.

Hour load data have now been collected back to 1976 and are presented in Figure 6 as the best indicator of change in the attendance patterns of the District's students. Numbers for 1978, 1981 and 1984 are estimates derived from changes in unit load in those years. The new figure indicates that although the numbers of students in all three categories of attendance have declined since the 1981-82 peak, the drop-off of lower load students has been much more substantial than that of more full-time students. Over the whole period, enrollment of part-time students has been more volatile and would appear to be particularly sensitive to economic fluctuations-- increasing during periods of economic recession and declining during business upturns, when the greater availability of work may draw them out of school.

FIGURE 6: DISTRICT UNDUPLICATED ENROLLMENT BY HOUR LOAD, FALL 1976 - FALL 1998



Comparison of the two measures in the following tables reveals how significant the discrepancy between hours and units can be. The Unit load table shows only 28% of District students attending full-time, whereas in hour terms 39% are full-time students, a difference of eleven percentage points. Students attending fewer than six hours are only 27% of the District student body, while those carrying fewer than six units at census are 34%. Full-time students are the largest group in hour terms, whereas by units the plurality lies in the middle range between six and twelve units

ENROLLMENT BY PRIOR EDUCATION

This table and figures are included to indicate the highest educational attainment level of students at the time of their first enrollment in LACCD colleges. Slightly over 60% of LACCD students have graduated from a U.S. high school prior to entering college. When those who completed their secondary education abroad are included in this group, the proportion rises to 75%. Another 6% of the District's students have not graduated from secondary school but have completed some type of equivalency program. Eight percent of students have not completed secondary school or its equivalent in any form. (Some of those latter students may be concurrently enrolled in an adult school administered by a high school district.) These four groups constitute the "mainstream" of community college enrollment, in that the success of community college programs is best measured by determining the extent to which adult post-secondary students achieve their college-level educational goals.

Two other groups of students are outside the mainstream, in that their goals do not coincide with the principal "traditional" mission of community colleges. These include younger students concurrently enrolled in high school who are taking college courses, both to benefit from higher level instruction and to smooth their possible transition to college enrollment after graduation from high school. Only 3% of LACCD students are concurrently in high school. The other group is composed of older students who have already obtained an associate or higher degree; and make up the remaining 9% of LACCD enrollment. They may be attending college to update their job skills, or to build an entirely new vocational career. A relatively large proportion of BA-and-higher degree holders are taking general education courses for personal achievement. (See also *Los Angeles Community Colleges Fall 1997 Student Characteristics*, January 1998, also posted on this web site).

ENROLLMENT OF INCOMING STUDENTS

In previous years, the *Annual Information Digest* included a Table on Enrollment by Entering Status, which described trends of student categories delineated by their past college enrollment or non-enrollment. In those tallies, 'continuing" students, who were enrolled in the previous semester, were always in a substantial majority. The trends in the nature of newly incoming students were obscured by the inclusion of continuing students. This year, the table focuses purely on incoming students, partly in response to the increased emphasis on the need to recruit more students for LACCD colleges. The tallies are in numbers rather than in percentages, since the variations in numbers of recruited students usually forecast the size and nature of college enrollment as a whole in subsequent years.

"First time" indicates students entering the particular college for the very first time, without transferring any units from another college. "New transfer" students are transferring into the college for the first time from another college. "Returning" includes all students that have attended before but have "stopped out" for at least one major semester, whether or not they have attended another college in the interim.

Due to computer coding problems, entering status data for Fall 1996 are not available.

ENROLLMENT BY EDUCATIONAL GOAL

Of all the tables and figures in the Digest, this set should be read with the greatest care, since selection of an educational goal is difficult for many entering students. In past years, a significant number of them were always unwilling or unable to mark a particular goal on the directory card, which until 1990 was the source of goal data. The old goals were listed in the schedule, each with a number that would be filled in the goal box on the directory card. Two of the eight goals listed were Undecided and a nebulous "Other". The limited list, and the cumbersome process of responding to it, resulted in a non-response rate of as high as 73% at some colleges. Thirty-nine percent of all District students filling out their directory cards in Fall 1989 responded to the goal question with "Other" or "Undecided", or simply did not answer the question.

The new list, introduced in Fall 1990, was developed in accordance with the needs of the statewide Management Information System (MIS) for California Community Colleges. It is printed directly on the new student application. There are twelve specific goals, plus one "Undecided", each with a response checkoff box. The response rate has been much higher than in previous years, but when the "Undecided" respondents are combined with the unknowns who left all boxes blank, the share of students without stated goals is still substantial, 19% of all District enrollment in Fall 1997. The "transitional" goal categories were not on the old application in any form, and thus can not be tabulated before 1990.

A disjuncture in the year-to-year tracking emerges in a data gap between 1989, the last year of the old questionnaire, and 1992, when the sample of students responding to the new questions has become large enough to furnish results that may be safely applied to the entire student body. The gap is bridged by matching old categories onto the new ones that most resemble them, adding the wholly new ones from 1990 on, and obtaining the best estimates using the small samples of 1990 and 1991 to calculate percentages that are listed and applied to the total enrollment figures. Estimates in the gap are shown by italicized percentages in the tables and broken lines in the chart.

It should also be remembered that these goals were stated only at the beginning of the students' enrollment in college, and do not represent shifts in goals that may occur later in their college career.

NOTE: The Major Goal Categories tallied above are inclusive of the following responses to the goal question on the Application for Admission:

Vocational includes: *Preparing New Career* (Old Category = Job Skills); *Advance in Job/Career*, *Discover Career Goals*; *Maintain License*, *Vocational Degree without Transfer*, and *Vocational Certificate without Transfer*.

Transfer includes: *Transfer with Degree* and *Transfer without Degree*.

General Education includes: *Associate Degree without Transfer* and *Personal Enrichment*.

Transitional includes: *Improve Basic Skills* and *Complete High School Diploma*.

TOTAL WSCH AND WSCH BY DAY AND EVENING PROGRAMS

Since the majority of students are part-time, Weekly Student Contact Hours (WSCH) is the fullest true measure of student enrollment activity. It is also the basis for calculating FTES. District WSCH was at its peak in Fall 1975, when it rose to almost 1,500,000. It than fell its lowest point since 1968 when it dropped to just under 900,000 in the Fall 1985. It rebounded somewhat to 1991 before beginning to fall again.

Over this period, evening program enrollment has remained relatively constant while day WSCH has suffered more decline; thus evening WSCH has increased as per cent of the total. The disproportionate drop in the number of younger students, shown above in Table 6, probably caused this pattern. In 1997 those under 20, who are more likely to be full-time day students, were little more than half their 1972 level. Older students, who are more likely to attend in the evening, have continued to be enrolled in more consistent numbers.

It should be noted that before 1992 day and evening WSCH were delineated by section number range; from 1992, they have been determined by the meeting time of the primary session. Evening WSCH would this include that produced by all classes starting at 4PM or later, and in all Saturday and Sunday classes. Before 1992, this time distinction was not as systematically employed in the designation of section numbers. As a result, the amount and proportion of Evening WSCH may have been slightly overestimated.

Source: Enrollment and Attendance Reports, 1968-1982; Computer Report CCAF130, 1983-1995; Report D3900, 1995-1998. Numbers before 1992 were determined by class section number range; from 1992 on, evening WSCH has been counted for all classes beginning at 4PM or later during the week, and for all weekend classes.

WSCH PER STUDENT

This measure of "average" student involvement in college instructional programs was highest overall in the late 60s and early 70s. It dropped significantly in 1979, probably as a result of program cutbacks immediately after the passage of Proposition 13. The rate rose again with enrollment and WSCH in the early 80s, then declined slightly following enrollment trends. In the 90s, the rate increased as fewer students took more classes, and part-time BA degree holders were, until Spring 1996, discouraged from enrolling by higher per-unit fees.

Non-credit WSCH is not included in the calculations.

and George Prather, Ph.D.
Senior Research Analyst
December 1998

HIGHLIGHTS:

- Both day and evening within-class retention rates in the LACCD as a whole stood at 76% in Fall 1996, having varied little since the mid 1980s.

- Categories of students with the highest rates of persistence include Asians, those under 20, and those with transfer goals. Those less likely to persist include blacks, those over 25, and students seeking to improve basic skills. Districtwide, fewer than half of any degree-seeking students have persisted in recent years. East and Pierce are the only colleges whose cohorts have averaged rates greater than 50%.

- Full-year transfers to UC institutions have declined each year since 1994-95, while CSU transfers have fluctuated slightly. Transfer totals have stayed close to 4,000 since the beginning of the 90s. ***A detailed breakdown of recent CSU transfers, including distribution among CSU institutions and academic performance, may be found on the CSU website at http://www.asd.calstate.edu/performance/.***

- Sixty Percent of LACCD's transfers in 1997-98 were members of ethnic minorities. In California overall, fewer than half (44%) of transfers in that year were minorities.

- The number of degrees awarded has continued to increase since the low point in 1990-91, as reporting of occupational certificates by the colleges has improved. The increase in total awards in 1997-98 was bolstered in part by an increase in certificates reported by City College.

STUDENT RETENTION AND PERSISTENCE

Table 19.1 and Figure 19 cover within-class retention information. The rate is the number of students enrolled on first census day divided by the number attending classes in the last week of the semester. Short-term modular classes cannot be included, but open entry-exit classes are, if they have begun by first census. The open entry-exit classes often have larger enrollments at the end of the semester than at the beginning, thus boosting the college's retention rates.

Table 19.2 plots the one-year persistence rates of all new students entering district colleges in four consecutive fall terms; each year-group is defined as a particular "cohort". The one-year persistence rate is the percentage of each cohort enrolled in the following year's fall and/or spring semesters. In this table, the total rate is shown, along with breakdowns by various student characteristics

The issues of retention and persistence in community college programs have become statewide concerns, and data systems are being developed to analyze and evaluate factors which are assumed to affect both these areas of student performance. These factors include counseling, assessment, placement, curricular design, and quality of instruction, among others. It may be some years before analysis of data can produce some conclusive explanations of student success or failure.

GRADE DISTRIBUTION

The most striking feature of grade distribution percentages is their uniformity across time, if not between colleges. Districtwide, the percentages of A, C and D grades have not varied as much as one percentage point year to year, although in Fall 1998 the A percentage stood almost five points above 1981. Variation among Bs has varied no more than 1.6 points. This constancy has also prevailed at most colleges.

The table has been divided in two, to show which proportions of student grades indicate successful completion of courses and which do not. Totals are sums of either successful or unsuccessful grades, with percentages of the total number of grades awarded each fall semester. Some improvement is indicated from the peak enrollment year of 1981, when 37% of outcomes were unsuccessful. By Fall 1998, the share of failing and non-completer grades had fallen to 30%.

In Table 20.2, the category of "Other Non-Completer Grades" includes in progress (IP) and report deleted(RD). IP is used for courses which are still in progress at the end of the semester. RD is assigned when there is a delay in reporting the grade beyond the control of the student. Neither IP nor RD is used in calculating grade point averages.

TRANSFERS TO UC AND CSU

The tallies in Tables 21.1 and 21.2 are numbers reported by the receiving institutions to the California Postsecondary Education Commission. They are based on the last community college attended before transferring and thus include only those students who transfer directly from Los Angeles Community Colleges to four-year colleges in California. They do not include LACCD students who attend colleges outside the District before transferring to four year schools, or who transfer to colleges and universities outside the state. They may thus understate the full contributions of District colleges to the transfer function.

A detailed breakdown of recent CSU transfers, including distribution among CSU institutions and academic performance, may be found on the CSU website at http://www.asd.calstate.edu/performance/.

Before 1984, data from private institutions was erratic and incomplete; in recent years it has improved, and the larger numbers of recent years reflect a more accurate count. However, there is no data on non-fall "full-year" transfers to these institutions. The University of California has been unable to provide full and reliable data on full-year transfers before the 1986-87 academic year, and there is no full-year data for any schools after 1993-94. For these reasons, and given the variations of transfers described above, analysis of long-term trends have focused on fall transfers to the UC and CSU systems.

Ideally, community college students having the intent to transfer would be flagged and tracked to all four-year institutions. The percent of such students transferring would be the transfer rate. As noted above, however, current transfer data are in the form of aggregate numbers reported by **some** of the possible receiving institutions. In addition, there is no consistent or reliable indicator of transfer intent. As discussed in a previous chapter, the format of the educational goals question has changed over time, requires a forced and unrealistic choice between occupational and transfer goals, and reflects the student's response only at the time of application.

Nevertheless, some means of appraising transfer performance by an institution is desirable. We have done this in two ways in the figures included in this section. Figures 21.1 and Figures 21.2 trace the number of transfers from the District to the University of California and to the California State Universities and Colleges and compare them to the numbers transferring from all California community colleges over the same period. Figure 21.3 compares the number of District transfers to UC and CSU institutions to two different entering cohorts. The first is all first-time college students entering three years prior to the fall of transfer. Transfers in Fall 1978 are compared to the number of first-time students in Fall 1975, etc. The second cohort is all new students, including those with some previous college experience, two years prior to the fall of transfer.

These various comparisons indicate that transfer numbers have roughly followed changes in total enrollment both for the District and the state as a whole. Fall transfers to University of California campuses declined sharply until 1986, particularly for the District, mirroring but somewhat exaggerating the enrollment declines of that period. Since that point they have rebounded to even higher levels for both the District and the state, reflecting but again exaggerating the enrollment growth. For transfers to CSU institutions the rebound appears to have begun more recently, with the District curve lagging behind that of the state and reflecting a weaker enrollment increase for the District. The combined transfers to UC and CSU fell behind increases in the entering cohorts in the early 1980's and the early 1990's but now, again appear to be in line with the long-term relationship.

Table 21.3 reports an ethnic percentage breakdown of full-year transfers by each LACCD college and the District as whole to the UC and CSU systems, with a section showing transfers from the entire CCC system for comparison. Non-resident aliens are not included in the ethnic tallies (contrary to other ethnic distributions in this volume), and are instead included in the "unknown" category.

AWARDS CONFERRED

Until 1993-94, the confirmed figures listed here for awards conferred in the various categories were obtained directly fom the Admissions Offices at the colleges. However, they often exceeded the numbers recorded in the HEGIS and IPEDS reports, and were greater even than those submitted from the District database to the state Management Information System (MIS); the latter were often submitted before the total year's tallies by the Admissions Offices had been completed. In recent years, the computerized input of awards data by colleges has improved, and some major coder discrepancies with the state program inventory have been resolved. The figures here from 1993-94 on have been obtained entirely from the LACCD database.

and George Prather, Ph.D.
Senior Research Analyst
December 1998

HIGHLIGHTS:

- District General Fund Income in 1997-98 increased for the third year in a row, but was still lower than its 1979-80 level in constant dollars.

- Early retirement incentives have affected the amount and percentage of instructional expenditures in recent years. In 1997-98, spending on instruction, excluding department chairs, increased to 52% of District expenditures. Almost a fifth of Unrestricted General Fund revenue was for employee benefits.

- Expenditures in EOPS and Financial Aid have not kept pace every year with their steadily increasing program enrollments. The Special Project Grants total declined in 1997-98, but still stood at almost twice its level at the beginning of the decade.

GENERAL FUND INCOME AND EXPENDITURES

The General Fund includes all funds that may be allocated at the discretion of district and college administration, plus employee benefits and some categorical funding. They include, among others, the funds identified as Program 100, which support the basic operations of the colleges and District. The inflation adjustments expressed in 1979 dollars are based on changes in the consumer price index for all consumers in the Los Angeles area, as reported by the Federal Bureau of Labor Statistics.

In expenditure categories, instructional support includes mainly libraries and learning resource centers. Department Chair expenditures were included under Instructional Administration from 1984-85 through 1988-89. In 1989-90 the state required Department Chairs to be reported under Instruction. In the following year, 1990-91, they were reassigned to Instructional Administration.

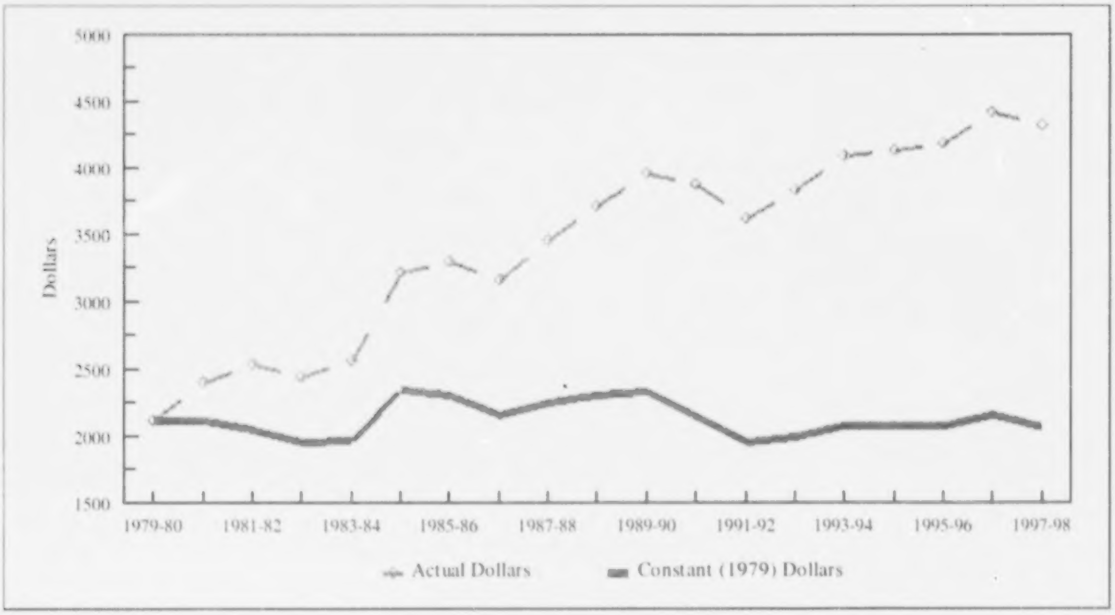
FIGURE 22.2: GENERAL FUND EXPENDITURES PER FTES (FULL-TIME EQUIVALENT STUDENT) 1979-80 THROUGH 1997-98



UNRESTRICTED GENERAL FUND EXPENDITURES BY LOCATION

The Unrestricted General Fund does not include categorical funding from agencies outside the District; it does include Instructional Television and the administrative costs of the Central Financial Aid Unit. With these restrictions, the total districtwide figure here is somewhat smaller than the total General Fund expenditure figure in Table 25.2. Department Chairs, formerly included under "Teaching, regular assignment", are listed separately.

In 1997-98, as in previous years, most Employee Benefits were charged to a Districtwide account; in the following year, these costs will be allocated to the colleges. In this table, the benefits costs by college and District Office have been estimated, in order to present a better approximation of college expenditures.

Other Distrctwide accounts, such as Instructional Television, Central Financial Aid Unit administrative expenses, Workmen's Compensation, etc. have been added to the District Totals for the appropriate object.

Source: Budget Branch, Business Services Division.

(1) Includes expenditures on sites, buildings, equipment and insurance.

(2) Includes: Districtwide accounts, to which most employee benefits were charged; International Education; Central Financial Aid Unit; Instructional Television; Tax Revenue Anticipation Notes; and Workmen's Compensation.

SPECIAL PURPOSE EXPENDITURES

This table covers programs that are not included in Program 100, but are nonetheless important components of regular college operations. The Cafeteria, Bookstore and Community Services obtain most of their income from fees and sales revenue. Instructional Television (ITV) and International Education were administered directly from the District Educational Services Division until Fall 1998, when the division was downsized, restructured, and renamed Instructional and Student Support Services. The International Education unit was abolished, and its programs reverted to the colleges. All ITV and most International Education classes have been offered through Los Angeles City College. Disabled Students Programs and Services was formerly included in this table; it has been moved to the more appropriate Special Student Services expenditure table, where it is broken out by college.

Source: Accounting by Object reports 3010-001 (Summary of Selected Programs), and Budget Branch, Business Services Division.

(1) "Other" includes books and supplies, operating expenses, and sites, buildings and equipment.

(2) Fringe benefits not charged to International Education, nor to Instructional Television before 1993-94.

SPECIAL STUDENT SERVICE EXPENDITURES

This table covers major areas of categorical funding that are student-service oriented but not vocational. Financial Aid grants are dispensed by offices at the colleges, and are from both federal (Pell) and State (Cal Grant, Work Study) sources. EOPS furnishes grants, specialized counseling and tutoring to special categories of disadvantaged students, and is overseen and funded by the State. Administrative costs for both these programs are borne by the District, and are included along with grants in these figures. Administration of Disabled Students Programs and Services (DSPS) is funded by the State, but the District must contribute an amount equal to the FTES reimbursement earned by the program. DSPS provides specialized counseling and instruction to aid disabled students in their classroom work, as well as services like notetaking, reading, and tutoring as needed. The Matriculation program is designed to enhance student success through testing, guidance and counseling.

Also listed here is Special Project Grants, an anomalous "catch-all" category meant to include all non-vocational grants obtained by the colleges which do not support permanent or semi-permanent specially funded programs. In this decade, the sources of these grants have included: the California Community Colleges Board of Governors and State Chancellor's Office; the California State Department of Education; the California Community College Foundation; the U.S. Departments of Agriculture, Education, and Health and Human Services; the City of Los Angeles Community Development Department; the National Science Foundation; The Metropolitan Life Foundations; the National Collegiate Athletic Association; and others. This category includes Title III grants but not Amnesty or Matriculation funding.

Source: Figures are supplied by the Office of Budget and Management Analysis. In Financial Aid, the outside funding agencies determine college and administrative office allocations, and in EOPS, the State agency determines college allocations. EOPS tallies include both administrative costs and grants.

1) District totals may include expenditures located at the District Office, as well as grants administered by the Office of Occupational and Technical Education, Educational Services Division.

Source: ENROLLMENT AND ATTENDANCE REPORTS, Office of Attendance Accounting; Student Data Tape 551, 1976-1994; MEDS Data Tape, 1994-1997.

Note: Figures for 1972 through 1975 are of questionable validity. Age distributions reported in the ENROLLMENT AND ATTENDANCE series are not completely consistent with those from the Student Data Tapes for later years. Proportions for 1973 through 1975 have been interpolated at the college level, and the absolute numbers and District totals recalculated from those proportions.

Sources: Through 1992-93, Final Budget documents; from 1993-94, Annual Financial and Budget Report to the State Chancellor's Office, CCFS-311. Both prepared by the LACCD, Office of Budget and Management Analysis.

(1) Financial aid payments to students are excluded.

(2) Differences between the beginning balance and the previous year's ending balance occur due to accounting adjustments.

Source: Data has been provided by various sources within the Los Angeles Community Colleges. In the categories of Financial Aid and EOP&S the funding agencies determine college and central administrative office allocations, and, in the case of EOP&S,the college allocations.

(1) District totals may include expenditures located at the District Office, as well as grants administered directly by the Educational Services Division.
